New Ethernet Demarc Unveiled

Telco Systems has announced its next generation of Carrier Ethernet demarcation and service extension products. The T-Marc 300 series product family is the first multi-port customer-located demarcation device to provide extensive management and test features for Ethernet, MPLS/VPLS and IP networks.

Unique features of the T-Marc include 4 or 8 combo access ports to support either 10/100/1000Mbps copper or 1Gbps fiber.

With purpose-built demarcation and service extension capabilities, the T-Marc may be deployed as a single customer demarcation device support multiple services, an MTU demarcation device supporting multiple customers, or as an inter-provider demarcation device.

FTTx Solution Gets an Upgrade

The latest in the Company's Active Ethernet FTTx products, the EdgeGate483S supports the growing bandwidth requirements for high speed, high-quality, reliable triple play communications - voice, video and data - to residential and business end users.

The EdgeGate 483S offers eight Ethernet ports to support both data and video services for computers and TVs, and two analog voice ports which can connect to two separate telephone lines which are converted to VoIP. The EdgeGate unique design future-proofs the user's access connection by supporting either 100Mbps or 1Gbps in the same product, thus allowing the service provider to start with 100M network to upgrade to 1Gig without replacing the CPE. Design improvements also include the ability to separate technician access areas from subscriber access areas as well as enhanced cable management.

White Paper: Looking Beyond HFC

The commercial services market can be lucrative for the cable operator. This paper looks at the deployment of Carrier Ethernet using the existing HFC network as well as an all-fiber network.

New Look for Telco Systems Carrier Ethernet Products

The Carrier Ethernet product family has been updated to a new look. Antique bronze covers will re-define the T-Marc, T5C and T-

Metro product. Products will start shipping with the new color as existing stock is depleted.

T-Metro in the new bronze finish

Saying Goodbye...

The Metrobility 100Mbps fiber-to-fiber media converters have recently been discontinued, effective July 30. Customers wishing to place a last buy order should contact their sales rep as soon as possible. Last orders may be subject to a minimum quantity purchase and will require an extended lead time.

Product Guide CD

We have just completed an interactive CD that includes product information and current datasheets for the entire Telco Systems product line. To request a copy, send email to marketing@telco.com.
