Find your competitive edge - at NXTcomm and SCTE Cable-Tec Expo

As many of you know, Telco Systems offers a broad base of multi-service carrier Ethernet platforms and solutions for both the access network and the customer edge. Our extensive product offerings enable carriers to easily evolve to an all IP/Ethernet network, while preserving the existing infrastructure and minimizing customer churn.

We'll be introducing several new products at NXTcomm 2007 in Chicago and at the SCTE Cable-Tec Expo in Orlando. These products include a new Ethernet demarcation device that delivers managed services across a Carrier Ethernet or MPLS network, an improved FTTx product that delivers active Ethernet for residential and SOHO implementations, and a new metro routing switch for high bandwidth, high-speed applications.
