## **Telco Systems Partners with AFL Telecommunications to Provide Turn-Key FTTx solution**

Telco Systems has formed an alliance with AFL Telecommunications to create a turn-key active Ethernet FTTH network solution. The alliance, called Fiber Made Easy, provides end-to-end system integration as well as consulting services and solutions to help developers deliver fiber-based networks.

## **New White Papers**

### **Making Metro Ethernet Services Carrier-Class**

It is not surprising that service providers are deploying Ethernet to enable new services and create new revenue streams. Deploying an Ethernet service in the metro access network is suitable for converging video, voice and data application over a simple, cost-effective infrastructure. This paper addresses the key issues of delivering and managing carrier-class Ethernet services to the customer edge.

### **Multi-Vendor MPLS Interoperability Event**

The European Advanced Networking Test Center (EANTC) demonstrated the interoperability of advanced MPLS network services from 13 vendors at the MPLS World Congress this February in Paris, France. Telco Systems participated in this test event which was organized by EANTC in collaboration with the University of New Hampshire InterOperability Lab (UNH-IOL).

[The Test Report can be downloaded from the EANTC website.](#)

## **Upcoming Events**

NXTCOMM

June 19 - 21, 2007  
McCormick Place  
Chicago, IL USA

Archived Webcast

**OAM Steps Up to Make Ethernet Carrier Class**

Irit Gillath, Vice President of IP and VoIP Product Line Management for Telco Systems, was a presenter at this webcast hosted by *Telecommunications Magazine* and moderated by Michael Howard, principal analyst and co-founder of Infonetics Research. This webcast examined how service providers are becoming more familiar with delivering Ethernet services, and manufacturers are providing Ethernet OAM tools that make Ethernet carrier class.
